DETAILED ACTION

Title and Abstract

The title of the invention and the abstract are not descriptive of the invention as now claimed. A new title and abstract are required that are clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is confusing as it recites incorrect Markush language. Amending "or" on line 27 to recite "and" will overcome this rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over 5,855,590 (Svensson et al). Svensson (equivalent of WO 96/34606) discloses (column 2, lines 24-61, examples 1-2, 4, 5-6, claims 6 and 12) a composition comprising the instant compound, excipients and other agents.

The claims differ over Svensson in reciting a water content below about 1%. However, Svensson recites that the water content of the excipients and diluents are

Art Unit: 1614

very low in order to minimize the water content of the pharmaceutical composition and that lactose is used in its anhydrous form. In the absence of a showing of unexpected results, no criticality is seen in the water content limitation, since it is not recited in the examples and they do not use anhydrous lactose.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 6,710,050 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because the process of preparing a pharmaceutical composition comprising the instant compound and having the instant water content renders the instant composition obvious.

Claims 1-21 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6, 7, 9, 11-13, 16, 28-31 of copending Application No. 09/450,609. Although the conflicting claims are

Art Unit: 1614

not identical, they are not patentably distinct from each other because the composition of '609 comprises the instant compound and has a low water content which renders the instant composition obvious.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
